# Active Directory Manager

**Active Directory Manager** is a comprehensive web-based management and reporting solution that increases security, improves productivity and simplifies provisioning while proving compliance in Windows environments.

## LOWER COST

*Reduces administrative costs by providing a web-based interface to automate management tasks, delegate roles, and optimize your infrastructure to prevent costly errors and downtime.*

## ZERO DOWNTIME

*CionSystems Active Directory Manager is web based for high availability.*

## COMPLIANCE

*Comprehensive AD reporting. Review and enforce access controls. Easy generation of formatted, customizable reports to demonstrate compliance.*

## SEARCH AND REPLACE

*Using this enhanced functionality Administrators can change object properties in seconds.*

## POWERFUL REPORTS

*More than 200 ready-made reports are available. These reports can be customized, exported or emailed, ensuring IT Administrators have the latest information available.*

Active Directory (AD) is at the heart of all Windows infrastructure in any business environment, where all Microsoft enterprise applications depend on it. Businesses today change at a frantic pace making AD management one of the most time-consuming IT tasks, and doing so efficiently is becoming very challenging. Windows Server provides basic built-in tools for AD administration but lacks enterprise-class management capabilities that help IT organizations effectively secure, delegate, or report on the ever-changing state of their AD infrastructure. Active Directory Manager streamlines security, reporting and delegation tasks and provides a central point of access and control for the entire AD environment. Active Directory Manager's robust and scalable feature set reduces the Windows Server and AD infrastructure total cost of ownership (TCO) with time-saving point and click control.

Active Directory Manager simplifies enterprise-wide Windows Active Directory management and reporting:

- Spend less time managing everyday AD tasks
- Easy delegation of routine tasks to other IT resources (i.e. Help Desks)
- Generate comprehensive reports on AD objects, containers, groups and more

AD Administrators struggle to keep up with requests to create, change or remove user access to various network resources. With the advent of compliance regulations like the Sarbanes-Oxley Act (SOX), and the intense scrutiny they place on access to business-sensitive applications, companies can no longer rely on numerous manual provisioning processes to maintain compliance.
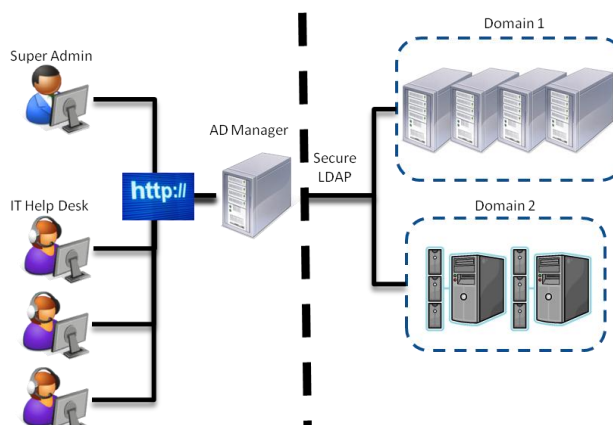

## TIGHT SECURITY

*Simplify and standardize IT permissions and privileges. Eliminate over-privileged users. Guarantee consistent delegation using Role-Based Delegation.*

## MANAGEMENT UI

*Manage your AD from a single, integrated, easy-to-use, dynamically configured and customizable Web interface for administrators, Help Desk personnel and others in the IT organization.*

## MICROSOFT EXCHANGE

*CionSystems can help maximize your investment in Microsoft Exchange with our mailbox management and reporting solutions.*

## BULK MANAGEMENT

*Create or delete multiple users, groups and more, in a single attempt. Use templates to import attributes, including Exchange and Terminal Services.*

### What problems does it solve?

- Eliminates repetitive, routine or complex tasks associated with AD management

- Automates scheduled management and reporting activities for IT Administrators

- Facilitates Single or Bulk creation, modification and deletion of AD objects

- Acts as an essential resource during Compliance Audits like SOX, HIPAA, PCI, etc

- Securely manage all users and objects across multiple domains

### Role-based Delegation

- More granular delegation of administrative authority

- Delegate tasks like reset passwords, create/delete/disable accounts, unlock user accounts

- Exercise control over every attribute modified

### Group Policy Management

- Manage GPO settings, Security Group Filters, Delegation, Link and unlinked GPOs

- Enable/disable class of settings for GPOs

- Apply and manage WMI Filters

- Backup/Restore/Import GPO Settings

- Over 60 GPO-specific reports, including viewing GPO settings, can be exported to HTML, Excel, Word

### Temporary User and Group management

Automates adding or removing users or groups that only need to exist for a specific time period. Makes it possible to add or remove members from groups on a scheduled basis, ensuring that particular users and groups are deleted thus improving security by reducing orphaned accounts and groups.

### Site, Schema, Replication and ACL

Using the web-based interface, IT administrators can easily manage the Site, Schema, Replication and ACL.

## Take the next step

Active Directory management is critical to your organization's productivity. Make sure you are in control of your network. CionSystems products can help you achieve maximum productivity and streamline your processes. Contact us today for an in-depth analysis of your Active Directory needs, or visit us at www.CionSystems.com for more info.
